

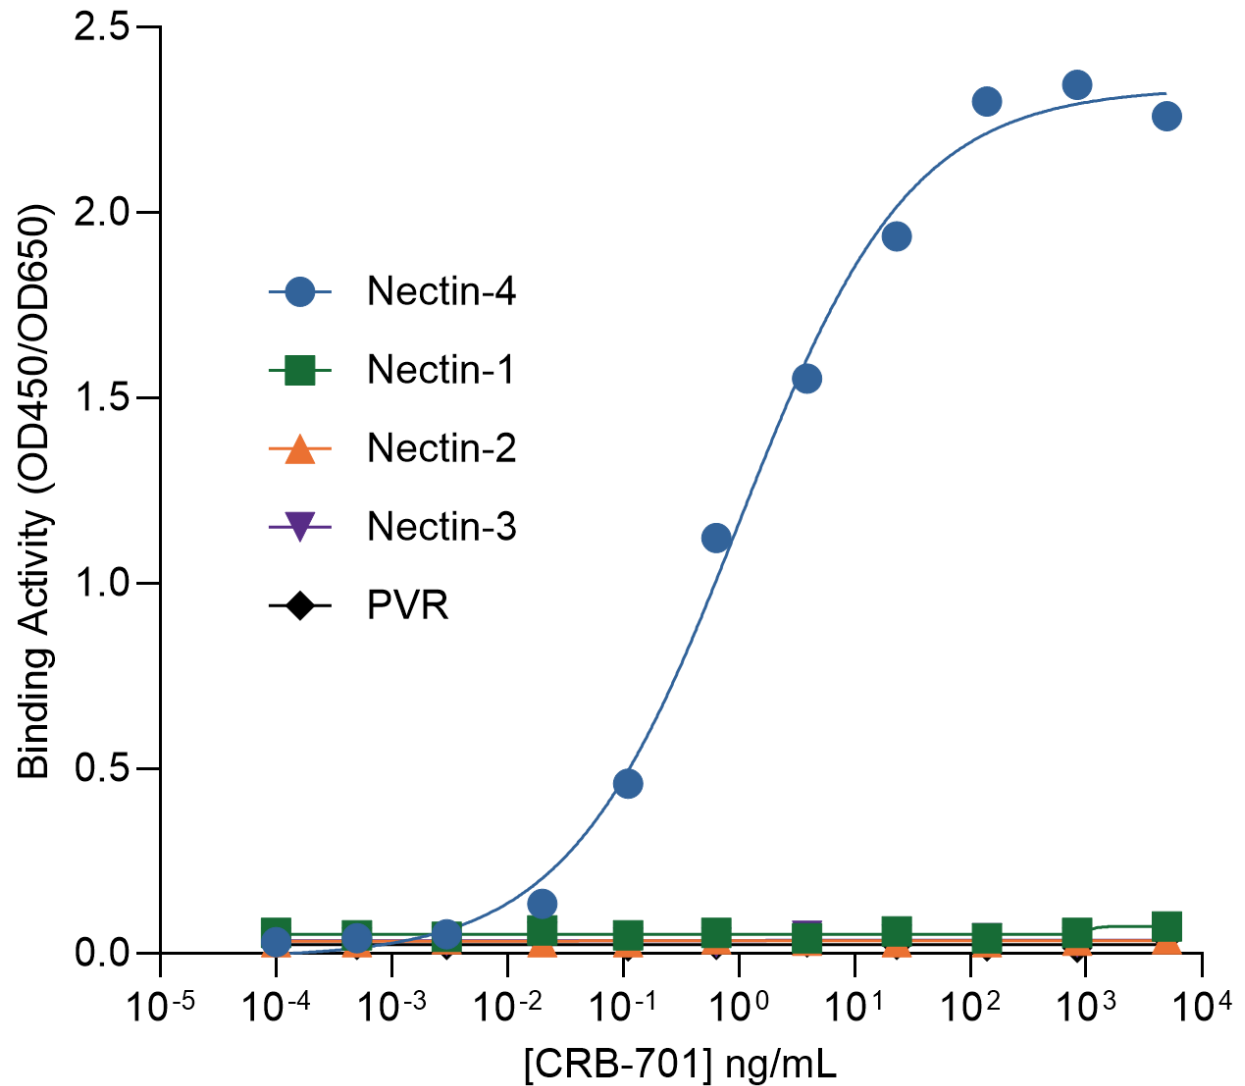

Figure S1. (?):ELISA measuring binding of CRB-701 to His-tagged nectin-1, nectin-2, nectin-3, nectin-4, and PVR. Data are average of n=3 replicate wells. Data fit to a four-parameter binding model for nectin-4 indicated an ED₅₀ of 0.97 ng/mL; no appreciable binding was detected for CRB-701 to nectin-1, nectin-2, nectin-3, and PVR.

ELISA, enzyme-linked immunosorbent assay
