

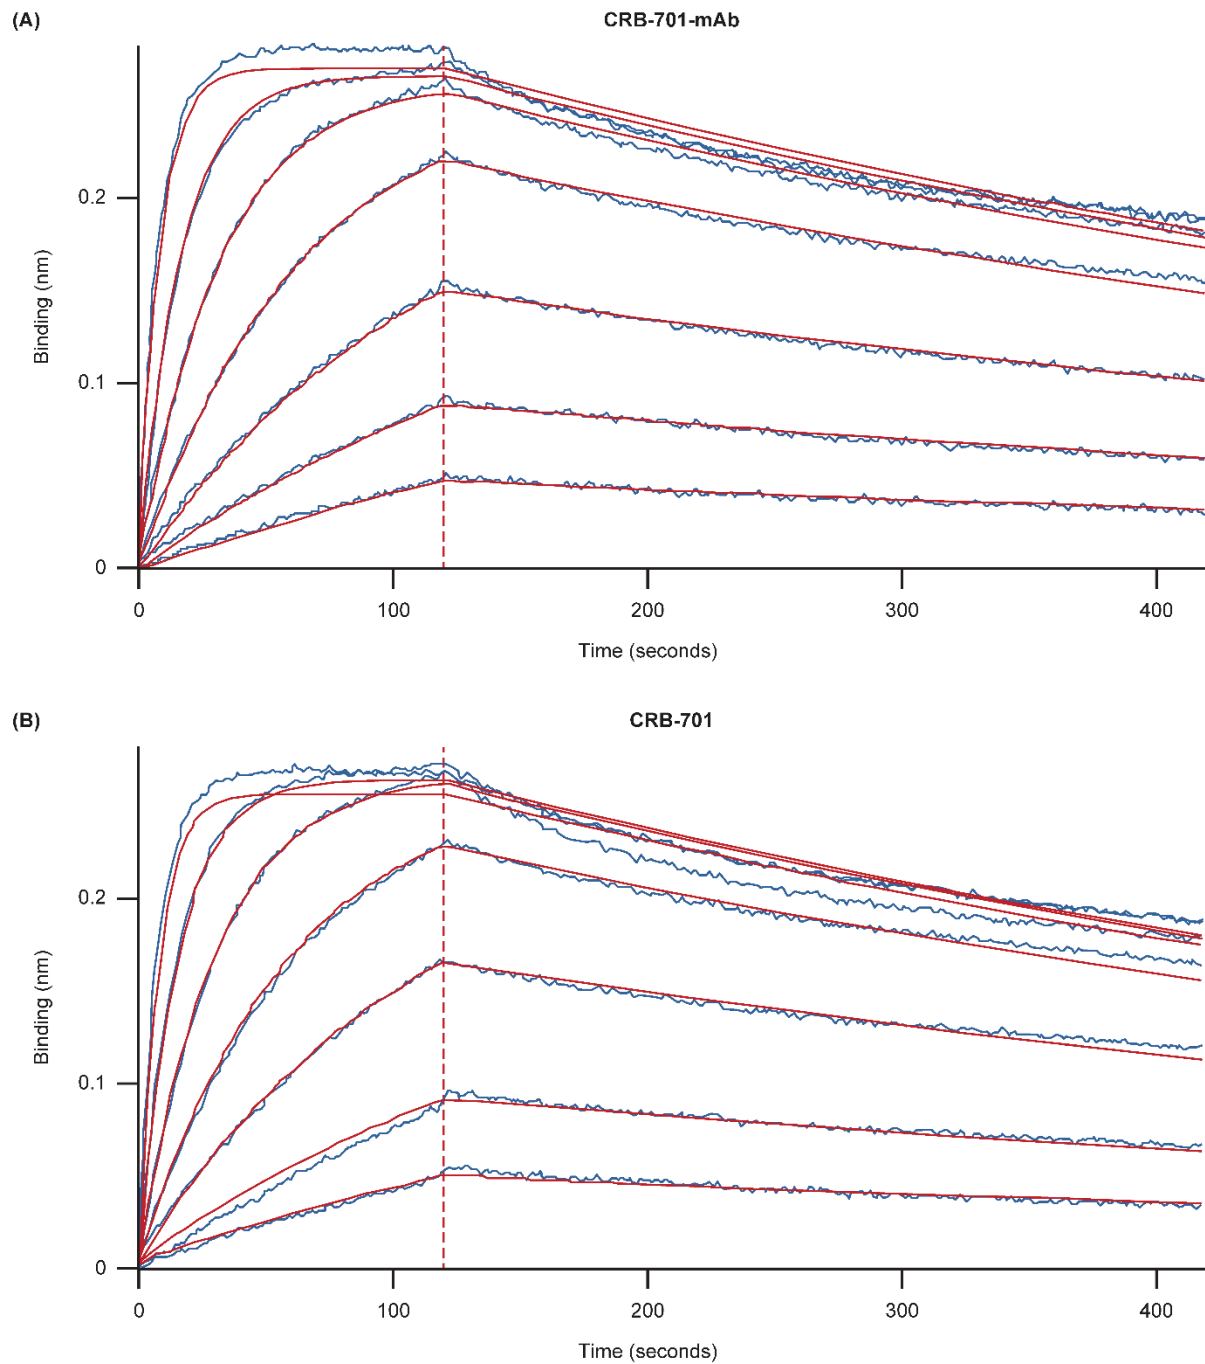

Figure S2. (A) Representative binding curves of interaction between CRB-701-mAb and nectin-4 (fitted to K_d : 2.193 nM; r^2 : 0.9977) and (B) CRB-701 and nectin-4 (fitted to K_d : 2.063 nM; r^2 : 0.9964) as determined by the BLI method.

BLI, biolayer interferometry; K_d , binding affinity (k_{off}/k_{on}); mAb, monoclonal antibody.
