

**Table S2.** Intracellular MMAE release in PC-3 and PC-3-NECTIN4 cells following treatment with 2 µg/mL CRB-701

| Released MMAE (ng/mL) |      |
|-----------------------|------|
| <b>PC-3</b>           |      |
| 0 hours               | BLQ  |
| 6 hours               | BLQ  |
| 24 hours              | BLQ  |
| <b>PC-3-NECTIN4</b>   |      |
| 0 hours               | BLQ  |
| 6 hours               | 0.21 |
| 24 hours              | 0.55 |

MMAE release was determined by LC-MS/MS. Lower limit of quantification: 0.023 ng/mL.

BLQ, below limit of quantification; LC-MS/MS, liquid chromatography–tandem mass spectrometry; MMAE, monomethyl auristatin E.
